

Seminar Exercise 1

Introduction of a quality management system

Introduction:

Your company produces world clothing (T-shirts, shoes, jeans, etc.) currently calls for the European policy, the introduction of quality standards in terms of environmental protection and social working conditions. Your business, we call it "zik". They commissioned you to plan a quality management system that can meet these requirements of the EU.

The management has to determine which demands and expectations of the individual departments of the company are made on the future quality documentation now commissioned.

The goal is to obtain a recognized quality management certificate.

task:

Work out in the group which steps are necessary to the quality system to implement.

Justify the planned steps!

example:

Required operation

QM-Handbook

and therefore we are:

write and print the book
